

FAITH FOLLANSBEE

• software engineer • Boston, MA •

EXPERIENCE

General Assembly Software Engineering Immersive Fellow • 2019

- Developed four full-stack applications in an intensive software development program spanning 420+ hours over 12 weeks
- with Ruby on Rails, Python with Django, Express with NodeFront-end web application development with JavaScript frameworks such as Angular and React

FULLSTACK PROJECTS

Movie Collector:

Developed a website that allows authenticated users to search a database of movies and tv shows to access information and create collections of media
Built on MongoDB, Express, React, Node.js, Javascript, HTML, and Bootstrap

Recipe Tracker

RecipeTracker: Virtual Recipe Book (Fullstack)

Developed a web application to allow authenticated users to create recipe cards and the ability to filter through their cards by tags.

Built using Ruby on Rails, PostgreSQL, Javascript, Ruby, HTML, Bootstrap

BucketList

Developed a goal setting app to allow authenticated users to list, filter, and check off goals as they complete them

Collaborated within a group of three developers to design and implement the project

Built on MongoDB, Express, Javascript, Node.js, HTML, and Bootstrap

Tic Tac Toe • Frontend

Developed frontend for a Tic Tac Toe game API

Built using Javascript, HTML, CSS, and Bootstrap

OTHER EXPERIENCE

Reasoning, Decision Making, and Cognition Laboratory, University of Massachusetts Amherst 2018-2019

- Analyzed data using computational modeling
- Tested and gave feedback on studies Assisted in research design
- Scheduled experiments and collected data from human subjects
- Presented relevant research papers to team

SKILLS

Proficient in Javascript, Java, Ruby on Rails, MongoDB, React, HTML, CSS, Express with Node
Experience with Agile and Scrum

EDUCATION

2016 - 2019 • University of Massachusetts Amherst
BA in Psychology, minor in English Literature

2015-2016 • Mount Holyoke College, South Hadley MA
